

RUSSIAN PROJECT IN BUDAPEST

Hungary

25X1

25X1

part of the project and several thousand of truckloads of granite-stones and dirt had to be moved away. The entire area were closed in a radius of $\frac{1}{2}$ miles from the location of the main building. Then they completed the big gray building with the fences and continuation of excavation in an unknown expand. The project is in the Gellert Mts. W. of the Danube River and it is about one air-mile East from the Citadella (army arsenal).

Reference map:

Hungary, city plan, Budapest 1:15,000. AMS Series MB73, Edition 1-AMS. Sheet No. 3.

Location on the above sheet: In the square of: 351 - 353 and 3162 - 3261 in the SW section of the square.

Several trails running in all directions on the entire hill, used by rustic people as paths. Here only the main trail.

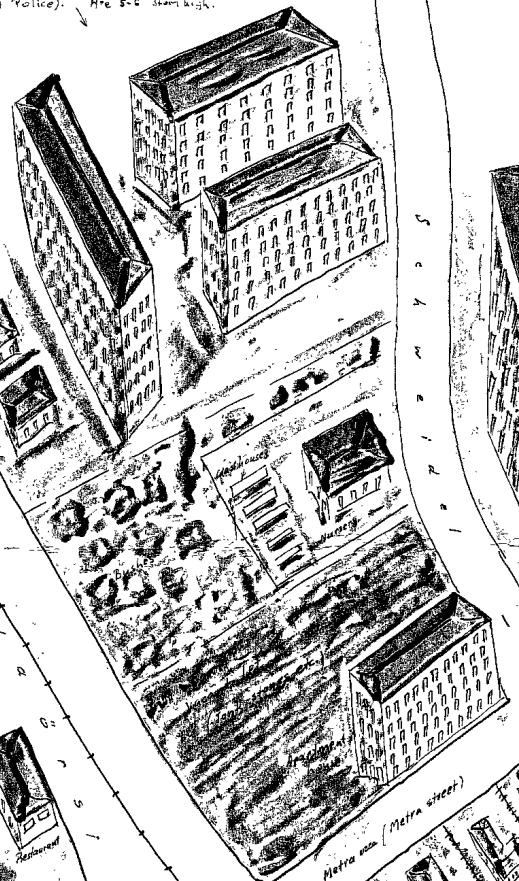

The entire area to be seen in this drawing is closed for the public, with exception for the electric street car with one stop (a xx).

$\frac{1}{2}$ mile to the Red Cross Hospital

The so called "Yellow Houses" are apartment houses built recently (1953-55) by the city of Budapest. Occupied by members of the Russian army and the AVO (= the Hungarian secret police). Are 5-6 stories high.

These small buildings belong to the same units. May there are some offices of the housing project (?)

Almost in the middle of street

This is the "Kék Duna" (= Blue Danube) restaurant. Serves members of the Russian army and the AVO.

$\frac{3}{4}$ mile to the next peak Sashegy 259 meter elev. to SW.

To the Airport of Budapest

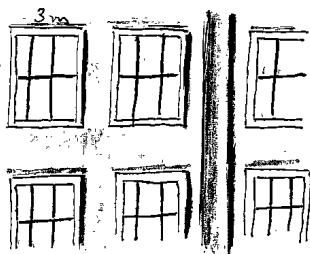

THIS IS A ROUGH SKETCH APPROXIMATELY

Underground station of the telephone system. Enlarged after the big gray building was completed.

Electric street car on left side of the street

Legend:
1. Utc or utca = Street
ut = Blvd.
Wijas = Szem Imre's Blvd.

See Correction according to the gray building on the opposite side of this paper.

Gray colored wall with 3x4 meter windows with iron bars. Between two windows one about 2' foot wide, darker gray column from the top to the ground & plastered.

VERTICAL LINE

Correction

After this drawing was finished I checked with source for possible ~~changes~~ —
On the gray building we have to make the following changes:

- 1) The roof of the building is flat, with fairly good OBSERVATION
with tar-paper on the surface which is gray in color and
covered with small stones. The Russians using the roof
as look-out points to guard the project. The middle part
of the 3-section building is shorter than the 1st & 3rd ^{foot}.
- 2) Around the roof they built a strong, about 3'-3 $\frac{1}{2}$ " high
steel fence. Several doors open from the roof into
the building.

Notice: Roof conditions, as marked on the drawing, is then a
mistake which come from my notes got from source,
and from the original map-scratch made by him
and roof marked in 3-angle shape, which hints on
this drawing indicates to the true construction of the
roof.

Hungary

**Soviet Military Project with Underground Facility
in Gellert Mountains**

25X1

THIS IS UNEVALUATED INFORMATION

25X1

A Soviet Military Project approximately 600 yards from where I [redacted] (October 1956) in the Gellert Mountains west of the Danube River was completed early in 1956. This project can be pinpointed in Reference Map of Hungary, City Plan, Budapest, 1:15,000, AMS series, M-111, 211-1-1-AMS, Sheet No 3 in squares 35-352 and 35-352. Two to two and a half years of the four-year period that this project was under construction were devoted to the construction and excavation of the underground facility. During this length of time I was unable to determine what use was going to be made of the underground facility. The entire area within a radius of one-half mile of the main building is closed to the public (as of October 1956).
25X1

[redacted] detailed colored [redacted] sketch of 25X4
Soviet Military Project [redacted] The [redacted] 25X1 map gives considerable detail, showing location of several four and five story buildings in restricted area, tunnel entrance and ventilation towers for underground facility. ~~CONFIDENTIAL~~
